

IBM Data Analyst

Isaac Stallard

May 8, 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Programming languages and databases trends
- Demographic survey
- Method description
 - Gathering data.
 - Data analysis.
 - Data visualization.
- Presentation of results
- Discussion of findings and implications
- Final conclusions

INTRODUCTION

- Stack Overflow's annual developer survey for 2019.
- Analyzing trends in software development.
- Covers everything from favorite technologies to job preferences.
- Identifying skill requirements for the future
- Trends to predict where software development is headed.
 - 90,000 developers took this survey.
 - Data from developers around the world.

METHODOLOGY

- Collecting survey data
 - Stack Overflow developer 2019 survey
 - GitHub job postings
 - Programming languages and annual salary
- Data Wrangling/Exploration
- Exploratory Data Analysis/Data cleaning
- Data Visualizations
 - Highlights the relationships between data
- Dashboard presentation

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript and HTML will continue to be the most used programming language.
- Python is becoming more popular.
- C++ becomes a top 10 programming language to learn.

Implications

- Python is on the rise because of AI and machine learning.
- There is a demand for faster more efficient software.
- Cross-Platform development is needed to facilitate data across multiple platforms.
- Web development remains an important are of software development.

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Python is the fastest-growing major programming language.
- Firebase is beginning to be phased out by other databases.
- Postgre SQL will become the most used SQL database.

Implications

- Open-sourced databases are still used.
- Cloud-based databases will become more popular.
- Databases need to scale effortlessly to handle increasing volumes of data.

DASHBOARD

https://github.com/IsaacStallard00/IBM_Data_Analyst_Capstone_Project

DASHBOARD TAB 1

Current Technology Usage

Top 10 Language Worked With by Respondent

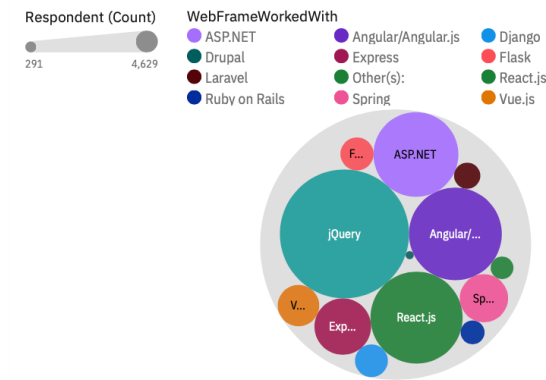

Platform Worked With by Respondent

Top 10 Database Worked With by Respondent

Web Frame Worked With by Respondent

DASHBOARD TAB 2

Future Technology Trend

Respondent by Language Desire Next Year

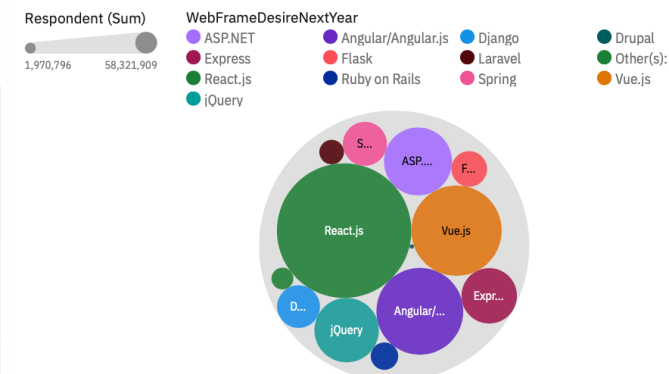

Platform Desire Next Year by Respondent

Respondent by Database Desire Next Year

Web Frame Desire Next Year by Respondent

DASHBOARD TAB 3

Demographics

Respondent by Gender

Gender
● Woman ● Man

Respondent for Country regions

Respondent (Count)
1 3,058

Respondent by Age

Respondent by Gender

Gender
● Man ● Woman

DISCUSSION

- Tech trends now and in the future.
- The importance of training.
- Increasing female participation in the tech field.
- How to decrease the gap in programming languages and databases in developing countries.
- How to eliminate age and education discrimination.

OVERALL FINDINGS & IMPLICATIONS

Findings

- Technology evolves fast and forever.
- Certain platforms are growing in popularity.
- Java, SQL, and Python are the big winners.

Implications

- The shift to cloud service providers in the near future.
- Having the necessary training to provide valuable analysis.
- Companies having a rigid structuring and not adjusting to the rapid changes.

CONCLUSION

- Trends for the current year and the next year.
- Programming languages, databases, and platform overviews.
- Demographics overview.
- Needed actions.
